- \* This 16,000 square feet consists of moving Printing Services Division paper normally held in storage at  to the new structure, as well as assigning space to the Building Services Branch, Logistics Services Division, OL, so that ground floor "corridor storage" which we are forced into from time to time can be eliminated. Such "corridor storage" is both aesthetically objectionable and has subjected us to criticism from both the Office of Security Safety Staff and the General Services Administration Fire Marshal.
